Project Idea Basic

- This is just a simple easy project for me to learn more About react native because I just finished code with mosh react-native part 1 course.

Why Do This Project

- I was Reading

10 Best React Native App Ideas for Beginners to Learn React Native

At Instamobile, we've built a ton of high-quality complex React Native apps, helping developers who are new to React Native learn the framework and launch their first React Naive apps much faster.

<https://www.instamobile.io/react-native-tutorials/react-native-app-ideas-beginners/>

- And then I thought let just do a blog
- So This is not to make money or anything this is purely for learning purposes I am going to publish this app to android just because

More In-depth of the Project

- So I want to do 5 Projects It might a lot hard but I am ok with it.
- This is the 1/5 Project
- So the name is Blog Stories (I just came up with it 😊)
- So A new User can Create and log in to a new account and they can just post about anything like a new story.
- This is just barebone
- and Also they can select whatever tag so they can create new tags, etc...
- It's going to be hard

Process

- ☐ Design in whimsical
- ☐ Design in Figma
- ☐ FrontEnd
- ☐ BackEnd
- ☐ Publish to Google Play Store

Conclusion

- -
